

MIG 270 C-4

MIG/MAG-compact welding machine for steel, stainless-steel and aluminium

Option: digital instrument

precise 4-rolls wire feeder

MIG 270 C-4 is a universal welding machine for repair and production of small parts. The welding machine has very good welding properties from 0,6 - 10 mm plate thickness special with thin plate steps for car body. It can be used for welding steel, stainless steel and aluminium with all gas mixtures, CO₂ and argon. The precise 4-rolls wire feeder and the full electronic control guarantee a safe wire feeding for aluminium too. The wire speed is automatically controlled through synergic control. The welding parameters are stored in welding curves and allow a very simple setting.

technical data

Mains voltage:	3x400 V - 50/60 Hz
Fuse rating:	16 A slow blow
Welding output:	30 - 270 A
Ratings at 40% ED:	250 A
60% ED:	220 A
Voltage control:	10 steps
Methods of welding:	continuous; spot welding
Wire drive system:	4-rolls \varnothing 37 mm
Wire diameters:	0,6 - 1,0 (1,2) mm
Wire reels:	D/K 200 - 300 (5-15 kg)
Weight:	74 kg
dimensions:	790x280(415)x710 mm
Norm:	EN 60974-1
Protection class:	S
