

# MIG 450 C-4 MIG 450 C-w

MIG/MAG-compact welding machine for steel, stainless-steel and aluminium

digital control

analog control

**MIG 450 C** is a welding machine with a very good cost/ performance ratio and excellent welding properties. The welding machine has a technical complete equipment, easy to use, robust and reliable. It can be used for all gas mixtures, CO<sub>2</sub> and argon. MIG 450 C-W is built with liquid cooling unit inside.

delivery option:                     MIG 450 C-4                     air cooling  
  MIG 450 C-W                     liquid cooling

**technical data**                     **MIG 450 C-4** (article no. 05454-L) and **MIG 450 C-W** (article no. 05454-W)

- Mains voltage:                     3x400 V - 50/60 Hz
- Fuse rating:                         32 AT
- Welding output:                    40 - 450 A
- Ratings:                             450 A / 40%
- 400 A / 60%
- Voltage control:                    20 steps
- Methods of welding:                continuous; spot welding,  
  soft wire start, burn back control, 2/4-Takt
- Wire drive system:                 4-rolls ø 37 mm
- Wire diameters:                     0,6 - 1,2 (1,6) mm
- Wire reels:                         D/K 200 – 300 (5-15 kg)
- Weight:                                146 kg
- dimensions:                         950x360(485)x840 mm
- MIG 450 C-W**                     liquid cooling system WK5 inside
- Weight:                                156 kg
- Norm:                                 EN 60974-1
- Protection class:                  S
- Option:                                digital instruments V/A, with memory  
  Synergic control
